

Island Bay Marine Education Centre

Snorkelling Adventures

Experience the marine environment on one of our snorkelling discovery adventures.

Our snorkelling discovery adventures are designed to give newcomers a close-up view of the marine environment.

Our Discovery Programme Centre is located in the middle of the Taputeranga Marine Reserve and has easy access to the Island Bay beach and rocky shore environment.

The marine life in the reserve is spectacular. We regularly see a wide variety of fish including Wrasse, Butterfish, Moki, Blue Cod, Seahorses, Octopuses and the occasional Stingray. There are loads of different Anemones for a splash of colour and lots of Paua, Crabs and Seaweeds to keep you enthralled.

“The slower you go, the more you see!”

Our trained and experienced staff will ensure you have a fantastic time exploring the Taputeranga Marine Reserve in comfort and safety. We provide full snorkelling equipment including quality 7mm wetsuits to keep you warm.

In the event of unsuitable weather on the south coast we have a number of safety audited alternate sites suitable for your snorkelling adventure. If you'd like to have your adventure at a different location please contact us. We're more than happy to discuss alternative arrangements.

For further information please contact us.
